Projects

- Portfolio Website | Personal Project** October 2025 - Present
Developed a responsive personal portfolio using Next.js, Typescript and TailwindCSS and deployed via Vercel.
- E-commerce Web App | School Project** February 2024 – Present
Built a full-stack e-commerce application using **Bun, Next.js, Typescript, TailwindCSS, ShadcnUI, Prisma, MySQL, REST API, Xendit, Cloudinary, Aiven, Vercel**; implemented secure user authentication, product catalog, shopping cart, checkout process with payment integration, and order management system.
- Programming Quiz Application | School Project** May 2025
An interactive programming quiz app built with **React Native Expo** and powered by **Firebase**, allowing users to upload profile pictures, track scores, view leaderboard rankings, and review quiz history in real time.
- Speedtyping Test | Personal Project** December 2023
A speed typing test built with native web technologies **HTML, CSS, Javascript**. The app challenges users with a static word list, measuring typing speed and accuracy in real time without the use of external frameworks.
- Discord bot | Personal Project** January 2025
A custom Discord bot built with the **Node.js, Express.js, Node Cron** and **Discord API** for the Back Benchers server. It features a predefined set of questions and answers, enabling quick automated responses to common queries.
