Self Employed

Davao City

Freelance Web Developer

September 2024 – Present

- Developed responsive websites and web applications using **HTML, CSS, JavaScript, TypeScript, TailwindCSS, React, Next.js, Node.js, Bun, Npm** and **MySQL**.
- Integrated **databases, Firebase, MySQL, Prisma, and REST APIs** to build dynamic functionality.
- Managed client communications, project timelines, and deliverables independently.
- Utilized **VS Code** and modern development tools for efficient workflow.

Skills & Interests

Technical Skills: HTML, CSS, Java, C++, JavaScript, TypeScript, React, Next.js, Node.js, Bun, Express.js, MySQL, Firebase, Prisma, REST API, VS Code, Android Studio, Excel, Microsoft Word, Powerpoint

Tools & Platform: Cloudinary, Git, Canva, Vs Code, Prisma, MySQL, Vercel, REST API, Bun, Npm

Language: English (Fluent), Tagalog (Native), Cebuano (Native)

Interests: Web development projects, open-source contributions, AI integration in websites

Projects

- **E-commerce Web App | School Project** August 2025 – Present
Built and deployed a full-stack e-commerce platform using **Bun, Next.js, TypeScript, TailwindCSS, Prisma, MySQL**, and **Upstash Redis**, with 470+ commits across backend, frontend, and infrastructure over 4+ months, adding 45k+ lines and refactoring/removing 22k+ lines through iterative improvements, implementing secure authentication, product catalog, shopping cart, checkout with custom payment integration, and order management, while applying basic SEO practices, caching, performance optimizations, and integrating **Vericel, Cloudinary, and Aiven**.
- **Portfolio Website | Personal Project** October 2025 - Present
Developed a responsive personal portfolio using **Next.js, Typescript** and **TailwindCSS** and deployed via Vercel.
- **Programming Quiz App | School Project** May 2025
An interactive programming quiz app built with **React Native Expo** and powered by **Firebase**, allowing users to upload profile pictures, track scores, view leaderboard rankings, and review quiz history in real time.
- **Speedtyping Test | Personal Project** December 2023
A speed typing test built with native web technologies **HTML, CSS, Javascript**. The app challenges users with a static word list, measuring typing speed and accuracy in real time without the use of external frameworks.
- **Discord Bot | Personal Project** January 2025
A custom Discord bot built with the **Node.js, Express.js, Node Cron** and **Discord API** for the Back Benchers server. It features a predefined set of questions and answers, enabling quick automated responses to common queries.
